

BIOSENSE WEBSTER Professional Education

Professional Education Guide

From professional education to the most advanced tools and resources to diagnose and treat cardiac arrhythmias, we're here to help ensure you're at the forefront of Electrophysiology (EP). Use this Professional Education Guide for EP healthcare professionals to easily navigate our programs including on-demand training, upcoming events, and the Peer-to-Peer program.

Upcoming Events

Join live, virtual education courses to engage with leaders from around the country.

Physician-led webinars:

Join live, virtual physician-led webinars to engage with leaders from around the country. Topics may include: Fluoroscopy Reduction, Complex Arrhythmias, Improving Efficiency and Efficacy, and more.

[Click here to register](#)

In-services:

Review EP concepts utilizing case reviews to help provide real-world examples on mapping and ablation strategies and case efficiencies.

Contact your local BWI representative for a list of topics and to schedule an In-service.

Remote Case Observation:

Attend an exclusive, virtual case observation to see BWI technologies used in a real-time procedural setting without the need for travel. **Coming soon.**

Physicians

Fellows

Allied Health Professionals

Interventional Cardiologists

Peer-to-Peer

Work with a thought leader to discuss EP concepts, review cases, and collaborate on real-world examples for mapping, ablation and EP lab efficiencies.

Contact your local BWI representative to schedule your Peer-to-Peer session.
